AMOENA

OVER 50 YEARS OF INNOVATION

From an idea to a global standard

Cornelius Rechenberg was still a student when he set in motion an innovation that would make life easier for countless women who had undergone breast surgery. As part of his dissertation at Rosenheim University of Applied Sciences, he developed a breast prosthesis that felt more natural than the plastic bags that were usually filled with oils or pastes at the time. It was the first silicone prosthesis. With it, Cornelius Rechenberg set the global standard that is still valid today – and the basis for the company amoena, which he founded in 1975 in Raubling, Upper Bavaria.

Unparalleled success story

Thus began an unprecedented success story more than 50 years ago. The first major order for 1,000 silicone prostheses was received in 1977, the first real production started shortly afterwards, and the first amoena foreign subsidiary opened in the USA in 1978. Above all, however, Cornelius Rechenberg and the amoena team worked tirelessly on further innovations for the care of women undergoing breast surgery, which led to numerous patented prostheses and later also underwear and swimwear collections. In addition to the products, the partnerships with our highly qualified and committed specialist retail partners have also developed over time – a decisive factor in amoena's success story.

Leading in modern breast care

Cornelius Rechenberg passed away far too early in 2001. But his vision lives on. Today, amoena is the world's leading manufacturer in the field of breast care. Since 1975, more than 30 million women around the world have used amoena's high-quality, innovative, and aesthetic products. At the same time, we are constantly working on further developments and optimisations to best serve the needs of women who have undergone breast surgery. For authentic and respectful communication, we rely exclusively on cooperation with the women concerned in this product catalogue.

We can now look back on 50 years of success – and look forward to the future. Because our mission is clear: We want to accompany as many women as possible on their healing journey.

AMOENA

OUR QUALITY PROMISE

a

With passion and unrivalled expertise, we develop and manufacture products designed to restore joie de vivre and self-confidence. Our prostheses are manufactured with the utmost care, exclusively by hand at our production site (Raubling in Upper Bavaria). This is also where our hospital care, lingerie, swimwear, and lymphatic care products are developed and designed.

Through good and close relationships, we inspire, strengthen, and support our approximately 16,000 specialist retail partners worldwide. We want to ensure that, with their help, women receive the best possible service and products that are optimally tailored to their needs. Today, around 380 employees at amoena – including around 210 at the headquarters in Raubling – are working on this with full commitment and passion. And together we all stand behind the amoena quality promise, which forms the basis of our success:

- **Perfect fit**
- **Fact-based sizing system with clever solutions for in-between sizes and smaller changes in girth**
- **Class 1* medical device**
- **Materials certified according to ÖKO-TEX 100**
- **Pollutant-free and high sustainability standards**

*excluding Liane Leggings, Linda Leggings and Lagos Swim Bermuda

AMOENA SUSTAINABLE DIVERSITY

A solution for all needs

Trust and experience are two important cornerstones of amoena. In order to support women throughout their entire breast cancer journey, we offer optimally coordinated product solutions in the respective healing phases right from the start of treatment: Our portfolio includes clinical care, partial and full prostheses, lingerie and swimwear, as well as lymphatic care. The associated products accompany women from diagnosis to their return to a normal life – supported by experienced and trustworthy specialist retailers.

AMOENA. YOUR SOLUTION.

Sustainability

Our variety of products and innovations is based on our four pillars of sustainability – an approach that we at amoena have been consistently pursuing for years:

SUSTAINABLE PRODUCTS

with a special focus on durability, recyclability, sustainable materials, and resource-saving designs.

SUSTAINABLE PRODUCTS

with continuous optimisation of processes, to conserve resources, reduce emissions, and minimise waste.

SUSTAINABLE SUPPLY CHAIN

with a focus on regional partnerships, short transport routes, responsible use of resources, and transparent ethical standards.

SOCIAL RESPONSIBILITY

towards employees, partners, and society with a focus on respectful cooperation as well as personal and joint development.

AMOENA IN NUMBERS

Approx. **380 employees**,
210 of them are located at the
production site in Raubling

Every minute, five amoena
products are purchased

Approx. **16.000**

Produced over **18 million**
breast forms

Represented in more
than **75 countries**

Approx. **250 tons**
of silicone being processed
in a year

Approx. **6.000**
product variants

Over **37 million**
Breast Care Textiles sold

PATIENT JOURNEY

Every woman is different – as is every case of breast cancer. We understand the challenges you and your patients face. This is why all of our product solutions are designed to complement each other and work together perfectly. You can choose from a range of combinations to support your patient on every step of her journey. amoena is with you to provide optimal care solutions every step of the way:

DIAGNOSIS

Whenever cells in the mammary gland grow uncontrollably, a tumour is formed. If this breast tumour grows destructively (invasively) into the surrounding tissue and damages it, it is considered malignant – it is breast cancer.

TREATMENT

PRIMARY SURGERY OPTIONS

- Breast conservation surgery
- Mastectomy
- Primary reconstruction

ADDITIONAL THERAPIES

- Endocrine therapy
- Chemotherapy
- Radiation therapy

SECONDARY SURGERY OPTIONS

- Reconstruction with implants
- Reconstruction with autologous transplant

AFTER SURGERY

During the wound healing phase until approx. 6–8 weeks after surgery

PRIMARY CARE

- Compression bras with sewn-in pockets to stabilise the surgical site and support the wound healing process
- Breast shaper with cotton filling

After the wound healing phase, from approx. 2 weeks to 2 years after surgery

SCAR CARE

- Compression bras and textiles in combination with silicone offer optimal scar treatment

RECOVERY CARE
WHERE HEALING BEGINS

LYMPH CARE
WHERE THE FLOW BEGINS

BREAST FORMS AND SHAPERS
WHERE SELF-CONFIDENCE GROWS

LINGERIE AND SWIMWEAR
WHERE EVERYDAY LIFE CONTINUES

RECOVERY

FEEL GOOD AGAIN

Permanent care after the primary treatment or after the post-op phase

COMFORT CARE

- Comfort bras and cami-sole bras are ideal companions for patients in the post-op phase and on their journey back to everyday life. Extra comfortable and easy to put on and take off.
- Breast forms and shapers

After complete wound healing

BREAST CARE

- Breast forms and shapers
- Lingerie and swimwear

Permanent care after complete wound healing

LYMPH CARE

- Special textiles and bras for relief
- Lingerie and swimwear
- Lightweight breast forms
- (Balance) Adapt Air
- Contact

WHERE HEALING BEGINS

CURASUPPORT COMPRESSION

Seamless post-op bras

Our seamless compression bras have been specially developed for wear after breast surgery. They support the wound healing process by keeping the operated breast secure and supported. In addition, they protect sensitive skin and scar tissue and can ease post-operative oedema and pain.

Reasons for our seamless, pre-washed post-op bras

- ✦ Seamless design without bulky or raised seams, which supports the healing process without further irritating the skin.
- ✦ Specially knitted areas that apply targeted pressure, encouraging lymphatic drainage and minimising the risk of post-operative oedema.
- ✦ Varying pressure levels for use after different surgical methods to suit the patient's individual needs and requirements.
- ✦ Pre-washed and ready for clinical use.

Leyla

LIGHT COMPRESSION

- A special compression zone supports the breast without applying direct pressure to its entire surface
- Specific pressure zones apply light pressure to the side and back sections to encourage lymphatic drainage and support the healing process

Sina

MEDIUM COMPRESSION

- Keep the breast supported and secure by applying pressure to the entire breast surface
- Specific pressure zones apply light pressure to the side and back sections to encourage lymphatic drainage and support the healing process

Pamela

HIGH COMPRESSION

- Keep the breast supported and secured by applying pressure to the entire breast surface
- High compression levels and specially knitted panels promote optimal lymphatic drainage

Reasons for our seamless, pre-washed post-op bras

- ✦ Medical compression
- ✦ Front closure for easy donning and doffing
- ✦ High cotton content
- ✦ Wide range of sizes
- ✦ Manufacturer-specific medical aid number

Product name Price category	Sizes Item No. Colour	Features Material
<p>LEYLA Soft Bra Front Closure premium</p> 	<p>60/65 – 130/135 Cup: Universal</p> <p><i>Improved workmanship</i></p> <p>  44605 white  44604 rose nude  44606 black </p>	<ul style="list-style-type: none"> • Light compression • Seamless knitted securing ring around the pre-formed cup to secure the breast without applying pressure • Prewashed and ready for use in a clinical setting • Zip closure at the front with hook and eyes underneath • High cotton content for optimal comfort <p>49 % Polyamide 43 % Cotton 8 % Elastane</p>
<p>SINA Soft Bra Front Closure premium</p> 	<p>60/65 – 130/135 Cup: Universal</p> <p>6 rows: 60/65, 70/75, 80/85 8 rows: 90/95, 100/105 10 rows: 110/115, 120/125, 130/135</p> <p>  45007 white  45006 rose nude  45008 black </p>	<ul style="list-style-type: none"> • Medium compression • Seamless, knitted cups secure the operated breast, applying even pressure across the whole cup area • Prewashed and ready for use in a clinical setting • With hooks and eyes for additional width adjustment <p>98 % Polyamide 2 % Elastane</p>
<p>PAMELA Soft Bra Front Closure premium</p> 	<p>60/65 – 130/135 Cup: Universal</p> <p><i>Improved workmanship</i></p> <p>  45010 white  45009 rose nude  45011 black </p>	<ul style="list-style-type: none"> • High compression • Seamless, knitted cups secure the operated breast, applying even pressure across the whole cup area • Prewashed and ready for use in a clinical setting • Zip closure at the front with hook and eyes underneath <p>98 % Polyamide 2 % Elastane</p>

EXPERT TIP

Suitable for use straight after surgery in the operating theatre

Our post-op compression bras (Leyla, Sina, and Pamela) are delivered prewashed.

FITTING TIP

Guaranteed fit with seamless post-op compression bras

No need to try Leyla, Sina, and Pamela compression bras beforehand. Thanks to our innovative measurement system, the underbust measurement is enough to determine which size is required. The universal cups fully enclose the breast, thanks to the special processing technology used to make them.

Product name Price category	Sizes Item No. Colour	Features Material
<p>COMPRESSION BELT advanced</p> 	<p>60–135</p> <p>  0776N white  45043 rose nude  0789N black </p>	<ul style="list-style-type: none"> • Developed for optimal post-op care. Holds the operated breast in place to prevent the implant from moving during the healing process • Velcro strip in the centre of the back panel to aid attachment to compression bras from the CuraSupport Compression product range • Individual adjustment possible <p>50 % Polyamide 21 % Elastane 18 % Polyester 11 % Cotton</p>
<p>ANATOMIC COMPRESSION BELT premium</p> 	<p>60–135</p> <p>  45044 white  45046 rose nude  45045 black </p>	<ul style="list-style-type: none"> • Holds the operated breast in place • Ideal fit, especially under the arms, for increased comfort • Velcro tape in the centre of the back for attachment to compression bras from the CuraSupport Compression product line • Individual adjustment possible <p>50 % Polyamide 21 % Elastane 18 % Polyester 11 % Cotton</p>

CARE INSTRUCTIONS

CuraSupport Compression bras are designed to be worn 24 hours a day and only removed for daily hygiene purposes. In order to ensure constant, effective compression throughout the care period, compression garments should be washed on a daily basis.

Patients should be advised to keep a spare garment for this reason. These are available on prescription to cover the hygiene requirements outlined above.

CURASCAR GARMENTS

Scar compression therapy

Our CuraScar garments are ideal for women who have undergone breast reconstruction using autologous tissue. The risk of excessive scarring at the site where tissue has been removed is significantly minimized by using a scar compression garment. Compression garments are used as part of a conservative therapeutic approach in scar therapy. When used early in the treatment phase, CuraScar garments can support the wound healing process and help to ensure a successful surgical outcome.

Compression in scar therapy involves applying pressure at a therapeutically effective level on the closed wound area. Even pressure applied to the surface of the wound reduces blood flow to the scar area and increases the elasticity of the tissue. As a result, the scarring appears flatter and fainter.

Why choose Curascar Garments?

- ✦ Prompt availability and precise sizing.
- ✦ High quality workmanship with no troublesome seams thanks to innovative bonding technologies that support lymphatic flow.
- ✦ Material can easily be cut for drainage tubes to pass through.
- ✦ Breathable materials that are kind to skin and ensure maximum comfort and are therefore likely to be used consistently for the duration of treatment.
- ✦ Apply medically effective pressure (20-23mmHg) to support the scar healing process.

EXPERT TIP

Compression and silicone are considered the gold standard in scar therapy, which is why we recommend combining all of our Cura Scar garments with a corresponding product from our CuraScar silicones range. Please see the following page for more information on our CuraScar silicone range.

FURTHER INDICATIONS

CuraScar garments are specially designed for use on tissue removal sites during the course of autologous breast reconstruction. They can also be used in numerous types of interventions for reconstruction and aesthetic surgery (e.g. skin tightening and Caesarean section) to stabilise the area operated on and reduce scarring and aid the healing process.

Product name Price category	Sizes Item No. Colour	Features Material
<p>BELLY BANDAGE Abdominal Compression Bandage premium</p> 	<p>S/M-4XL/5XL</p> <p>  45004 nude  45005 black </p>	<ul style="list-style-type: none"> • Applies medically effective pressure to the abdomen area to aid the scarring and wound healing processes until the scar is completely healed • Three closures (height: 24cm) enable easy opening and closure and provide the perfect fit for the patient's body <p>Nude: 59 % Polyamide, 31 % Elastane, 8 % Cotton, 2 % Polyester</p> <p>Black: 33 % Polyamide, 31 % Elastane, 29 % Polyester, 7 % Cotton</p>

<p>BERMUDA Long Scar Compression Panty premium</p> 	<p>XS-2XL</p> <p>  45002 nude  45003 black </p>	<ul style="list-style-type: none"> • Applies medically effective pressure to the abdomen and legs to aid the scarring and wound healing processes until the scar is completely healed • 2 zips on the sides for easy dressing and undressing <p>56 % Polyamide 42 % Elastane 2 % Cotton</p>

CURASCAR SILICONE

The gold standard in scar therapy

Our CuraScar silicones are ideal for the treatment of pathological scars following a surgical procedure as the use of silicone pads and compression significantly minimises the risk of excessive scarring in the wound area. Curascars silicones are used as part of a conservative/non-invasive therapeutic approach in scar therapy. When applied early on in the treatment phase (after wound closure), CuraScar silicones aid the scarring and wound healing processes and create optimal healing conditions for the skin.

Silicone reduces water loss in the upper layer of the skin. A moist environment creates the ideal conditions for scarring, making the scar smoother and reducing itching. Our breathable silicone pads also guarantee sufficient oxygen exchange.

Why choose Curascars Silicone?

- ✦ Breathable and highly elastic silicone that adapts perfectly to the body's contours
- ✦ Completely self-adhesive
- ✦ Reusable up to 6 weeks

FEATURES

- Can be cut to size individually
- Available with additional cover strips for better storage after cleaning

EXPERT TIP

Silicone and compression are considered the gold standard in scar therapy. Therefore you should recommend combining the corresponding product from our CuraScar garment range for each CuraScar silicones product. Please see the CuraScar Garments page for more information.

CLEANING INSTRUCTIONS

We recommend using amoena Soft Cleanser on CuraScar silicones on a daily basis.

VIDEO TUTORIAL

Overview

Product name Price category	Sizes Item No. Colour	Features Material
<p>STRIPS advanced</p> 	<p>Measurements: 260 x 35 mm</p> <p>● 010 (1) clear 1 pack contains: 1 pcs</p> <p>● 010 (4) clear 1 pack contains: 4 pcs</p>	<ul style="list-style-type: none"> • Long, narrow silicone strips <p>Polydimethylsiloxane, Polyurethane, Polyethylene protective cover strips</p>

CURASUPPORT COMFORT

Comfort bras and tops

Our comfort bras and camisoles are the ideal companion for patients in the post-op phase and on their journey back to everyday life. They are designed to offer additional comfort and be easy to use.

After the wound healing phase (6-8 weeks after the operation), the skin and fresh scar tissue are still extremely sensitive. This is one of the reasons why it is often not possible for patients to opt for special bra garments straight away.

Reasons to choose our comfort bras

- Wide straps and soft closures that don't cut into the skin ensure maximum comfort.
- Front closure makes it easy for patients with restricted movement to put the bra on and take it off.
- Integrated pockets keep breast forms and shapers securely in place.

Emilia
Soft Bra Front Closure

Product name Price category	Sizes Item No. Colour	Features Material
<p>EMILIA Soft Bra Front Closure advanced</p> 	<p>70/75; 80/85; 90/95; 100/105; 110/115; 120/125 Cups: Universal</p> <p><i>Improved workmanship</i></p> <p>  45013 white  45012 blush  45014 black </p>	<ul style="list-style-type: none"> • Perfect fit and optimal comfort thanks to seamless circular knit technology • Breathable insert on each side and along the underbust area for a pleasant feel against the skin • Zip with hooks and eyes at the front • High coverage for good support • Straps are adjustable at the back • Drain management can be attached <p>69 % Cotton 25 % Polyamide 6 % Elastane</p>

RECOVERY CARE MEASURING TIPS

CuraSupport Comfort

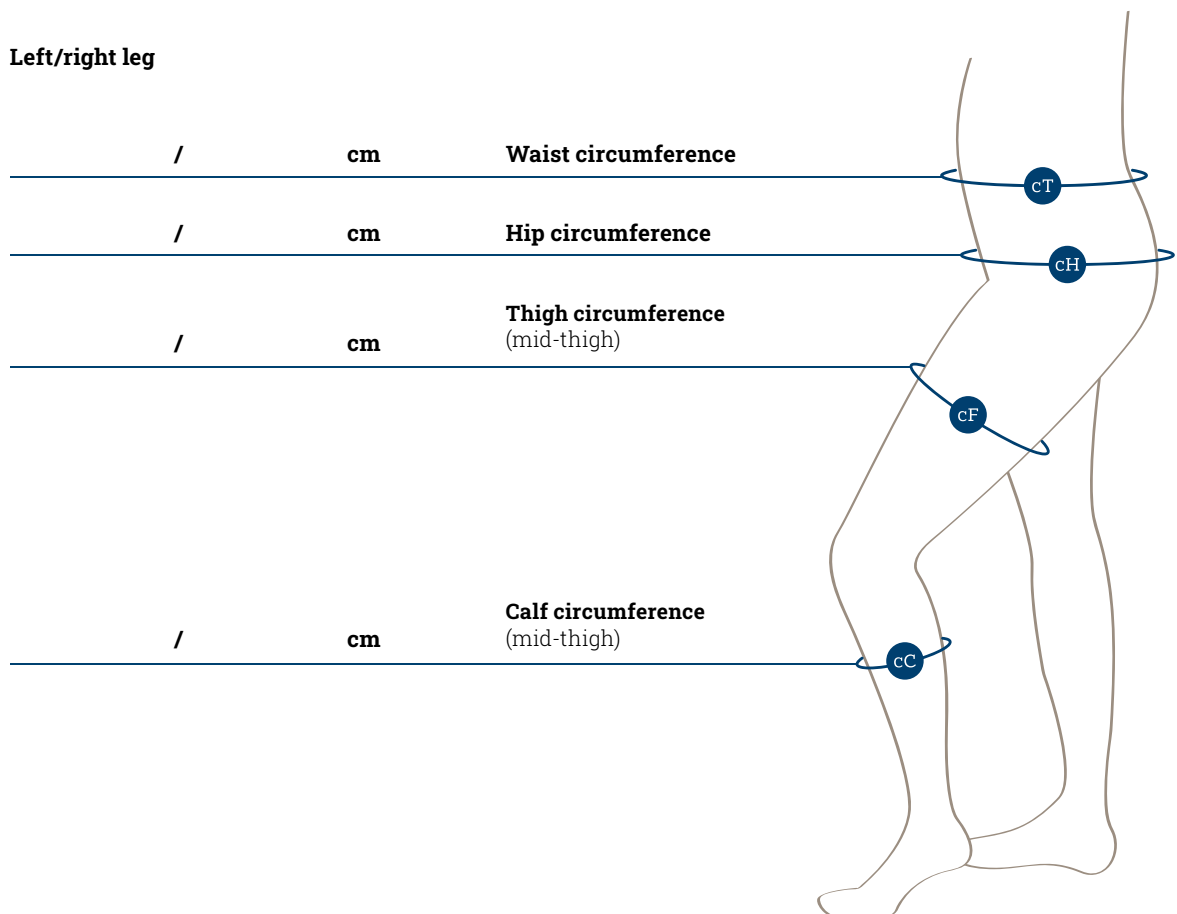

For more measuring tips, see page 104.

CuraSupport

The underbust measurement is the only thing required to determine which size is required for our seamless compression bras. There is no need to measure the chest circumference with our universal cup sizes, which can be individually adapted to the size required thanks to the flexible material.

CuraScar Garments

- Ask the patient to undress. She can keep her underwear on if it makes her more comfortable.
- Ask the patient to stand up straight, avoid tensing her stomach, and breathe normally.
- Make sure the measuring tape is in a horizontal position. The tape must not twist or slip.
- When measuring, make sure the measuring tape isn't too tight or too loose against the skin.
- Write down all the measurements you have taken directly onto the dimension sheet and measure again.

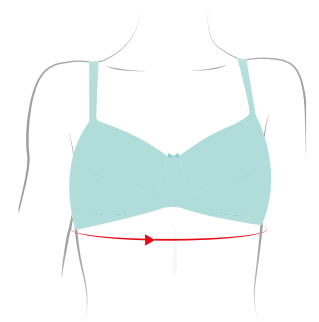

RECOVERY CARE SIZING CHART

CuraSupport Comfort

For sizing, see page 92 and 93 (lingerie sizing chart)

WHERE CONFIDENCE GROWS

BREAST FORMS AND SHAPERS

OUR TECHNOLOGIES

Constant innovation and setting new standards are driving forces at amoena. In close cooperation with doctors, medical retailers and women who have had breast surgery, we continuously develop new technologies to optimally respond to patient needs after breast surgery.

Soft and natural thanks to InTouch silicone

A special silicone formulation combined with a smooth and soft film creates a breast form that is as natural as possible in appearance and feel.

Easy adaptation thanks to innovative air chamber technology

Innovative air chamber technology allows the volume to be adjusted so that a close fit can be achieved, even on an uneven chest wall, enabling the form to be adjusted to the individual needs of your patients at any time.

Natural look with natural feel

A combination of lightweight and standard silicone that looks, feels and moves like a real breast. For a lightweight breast form with an ultra-soft feeling and a natural-looking drape.

Integrated air circulation

A structure consisting of three-dimensional pearls on the back of the form ensures air circulation and allows moisture to evaporate. This has been confirmed by Hohenstein Laboratories in Germany after extensive testing.

Temperature equalization from Comfort+ technology

The Comfort+ technology ensures constant and gentle temperature regulation between the body and form. In this way, it prevents unpleasant heat build-up under the form.

Soft gel backside

The transparent gel layer is particularly gentle on sensitive scar tissue.

Relief and natural comfort from self-adhesive forms

The amoena Contact breast forms adhere directly to the skin. amoena Contact silicone keeps its adhesion with correct care over the entire life span of the breast form.

BALANCE – BREAST SHAPERS PORTFOLIO OVERVIEW

amoena breast shapers balance out asymmetry after breast-conserving therapy, breast reconstruction, multiple biopsies, or in the case of natural uneven breast development. The soft silicone shapers fit snugly against the natural curves of the remaining breast tissue and fill the bra cup for a symmetrical silhouette, preventing tension, improving posture and correcting muscular imbalances.

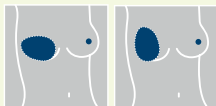

FEATURES

- **Innovative** – shaper also available with patented air chamber technology for individual adjustment
- **Versatile** – various shapes, sizes and thicknesses available for optimal customisation
- **Simple** – required thickness can be determined using our simple, tried-and-tested cup difference method

Sizing chart, fitting tips and advice regarding the cup difference method on page 32 and 33.

BALANCE – BREAST SHAPERS SIZING

Find the perfect breast shaper in 4 steps

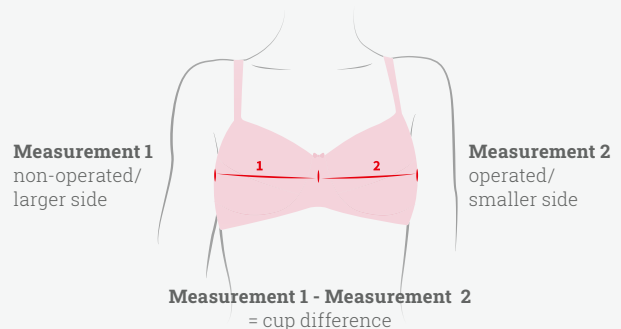

1. First, find **the right sized bra** for your patient (see the fitting guide on page 92).
2. Ask about your **patient's specific requirements** to determine which product range you need.
3. Determine which **shape** your patient needs (Oval, Delta, Ellipse or Special Varia).

CROSS CUP DIFFERENCE METHOD (CCD)

The cup is measured in centimetres from the centre front of the bra (breastbone) to the side seam.

1. Measure the fullest part of the cup on the non-operated / larger side (measurement 1)
2. Measure the fullest part of the cup on the operated / smaller side (measurement 2)
3. Subtract measurement 2 (operated / smaller side) from measurement 1 (non-operated / larger side)
4. The result is the cup difference (CD), which will help you to determine the thickness you need (thin, medium, or volume)

Less than 1 cm

²Depending on the size/shape of the custom-made breast form, some technologies may not be available.

INNOVATIVE NEW PRODUCT: ADAPT AIR CONTACT

Innovative self-adhesive full breast form – individually adjustable for optimal comfort!

Comfort+ technology

For reduced heat build-up and sweating behind the breast form.

Contact technology

Self-adhesive backing provides weight relief and ensures natural movement.

Air chamber technology

Volume can be adjusted precisely and individually.

Matt-soft **special membrane** and **premium silicone** for comfortable wear. Lightweight thanks to **InTouch Light Silicone** (25% lighter).

ADAPT AIR

Premium

Breast form with an adjustable back

ADAPT AIR TRIPLE-LAYER BREAST FORM

Soft, matte PU film and premium-quality silicone guarantee a pleasant feel

Comfort+

Reduces heat and perspiration beneath the breast form

AirChamber Technology

- Precise and individually adjustable thanks to its integrated air chamber technology – always a perfect fit, even with weight fluctuations or swelling due to lymphedema
- Particularly close fit thanks to a flexible, individually adjustable back
- More flexibility when choosing a bra thanks to fine adjustment of the volume

PARTICULARLY SUITABLE FOR WOMEN WHO:

- have uneven scar tissue
- experience weight fluctuations (and the resulting fluctuations in cup size)
- have swelling from lymphoedema

reddot winner 2020

GERMAN INNOVATION AWARD '21 WINNER

1) OVERVIEW OF CUP FORMS:

1 – Shallow cup form: concave silhouette, natural shape with additional volume in the lower cup area and a flatter upper breast; wider basic form

2 – Average cup form: even silhouette, main volume concentrated in the upper and mid-cup area, especially suitable for women with a larger underbust and small to medium cup size

3 – Full cup form: convex silhouette, main volume concentrated in the upper and mid-cup area, especially suitable for women with a smaller underbust and large cup size

2) OVERVIEW OF FORMS:

S = Symmetrical: Can be worn on the left and right side interchangeably

A = Asymmetrical: Specifically designed to be worn on the left or right side respectively. Extended form to compensate for missing tissue under the arm

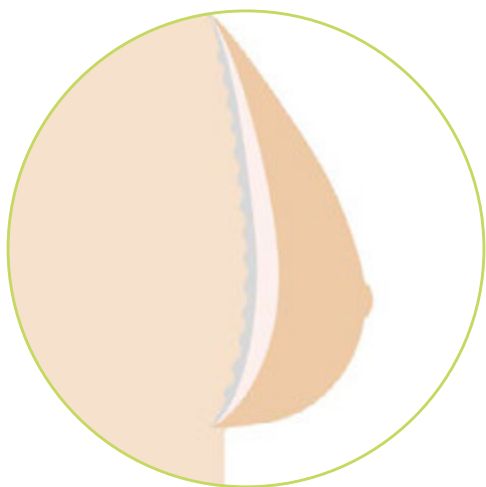

E = Extra: Specifically designed to be worn on the left or right side respectively. Particularly suitable for women with a smaller cup size and fuller breast shape

*Light und Xtra Light forms have a more muted colour.

For fitting tips and sizing chart see page 48 and 49.

1) OVERVIEW OF CUP FORMS:

1 – Shallow cup form: concave silhouette, natural shape with additional volume in the lower cup area and a flatter upper breast; wider basic form

2 – Average cup form: even silhouette, main volume concentrated in the upper and mid-cup area, especially suitable for women with a larger underbust and small to medium cup size

3 – Full cup form: convex silhouette, main volume concentrated in the upper and mid-cup area, especially suitable for women with a smaller underbust and large cup size

2) OVERVIEW OF FORMS:

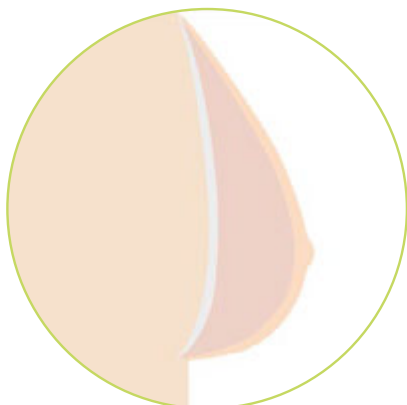

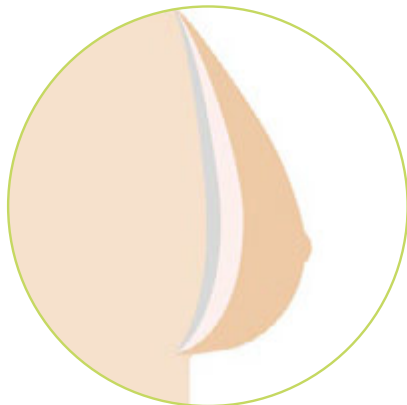

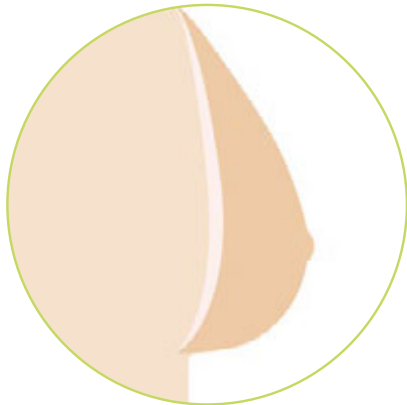

S = Symmetrical: Can be worn on the left and right side interchangeably

A = Asymmetrical: Specifically designed to be worn on the left or right side respectively. Extended form to compensate for missing tissue under the arm

E = Extra: Specifically designed to be worn on the left or right side respectively. Particularly suitable for women with a smaller cup size and fuller breast shape

*Light und Xtra Light forms have a more muted colour.

ACCESSORIES

BREAST FORMS – SIZING

Find the perfect breast form in 5 steps

1. First, find **the right sized special bra** for your patient (see the fitting guide on page 92).
2. Ask about your **patient's specific requirements** to determine which product range you need.
3. Determine the **cup form** required for the bra (**1 = shallow, 2 = medium, 3 = volume**)
Cup form refers to the shape of the breast or cup size in the bra.

1 = Shallow breast form	2 = Medium breast form	3 = Full breast form
		
1 = Shallow cup form	2 = Medium cup form	3 = Full cup form
More volume in the lower cup area	More volume overall	More volume in the upper cup area

4. Determine the breast form shape (**S = Symmetrical, A = Asymmetrical, E = Asymmetrical Extra**)

Symmetrical					Asymmetrical		Asymmetrical Extra	
								
1S	1S ^N	2S	2S ^N	3S	2A		3E	
								
Same volume					Axilla extension		Outer lower breast area	

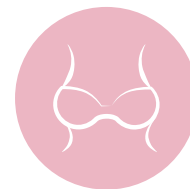

BREAST FORMS – SIZING CHART

5. This table helps you find the **right breast form size** based on **bra size**. Try out the breast form with a T-shirt to find out whether you've found the right fit.

Example: If the patient's bra size is 95 C, this corresponds to a size 9 breast form

LINGERIE AND SWIMWEAR

PERFECT FIT – WHAT TO CONSIDER

Underbust band too tight

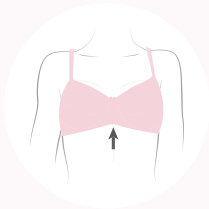

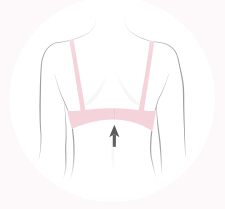

The underbust band feels too tight and uncomfortable. Try a larger underbust size or use an amoena bra extender.

Make sure the underbust fits properly: It should sit securely in place but still be comfortable and run in a straight horizontal line.

Underbust band too loose

The underbust band is loose and slides up and down the patient's back. Choose a smaller underbust size.

Make sure the underbust fits properly: It should sit securely in place but still be comfortable and run in a straight horizontal line.

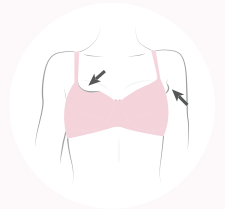

Bra keeps sliding upwards

If the slightest movement causes the bra to slide up, this is a sign that the underbust band of the bra is too wide. Choose an underbust band one size smaller and a cup one size larger

Bra cup digs in

If the cup squeezes or presses the breast in certain places, this usually means the cup is too small. Choosing a larger cup size will usually solve this issue.

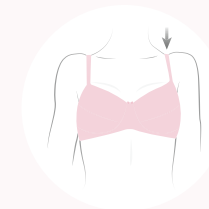

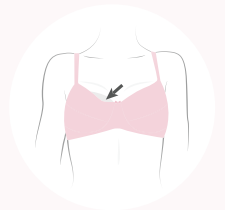

Bra straps are slipping down

The straps on the bra slide off the patient's shoulders. Generally, tightening the straps slightly should solve this issue.

Bra cup protrudes

If tightening the bra straps doesn't make the gaps or folds in the cup disappear, try a smaller cup size.

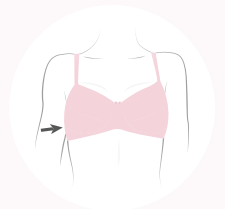

Bra straps are digging in

In this case, the straps may need to be loosened slightly. Alternatively, if the patient has a larger underbust, a wider strap may be required. If this does not solve the issue, the underbust band may be causing the issue (see above).

Bra underwiring digs in

For a perfect fit, the underwiring should follow the shape of the breast, gently enclosing it. The centre of the bra should sit close to the body. If the underwire digs in, the cup is probably too small. Choose a larger cup size and, if necessary, a smaller underbust.

ELEGANT

This feminine lingerie adorned with pretty lace, looks great and is comfortable too.

Kennie
Soft Bra

FEATURES

- Eye-catching styles featuring plenty of lace
- Customisable styles that can be personalised
- Comfortable and adjustable with elastic straps

LINGERIE AND SWIMWEAR FITTING GUIDE

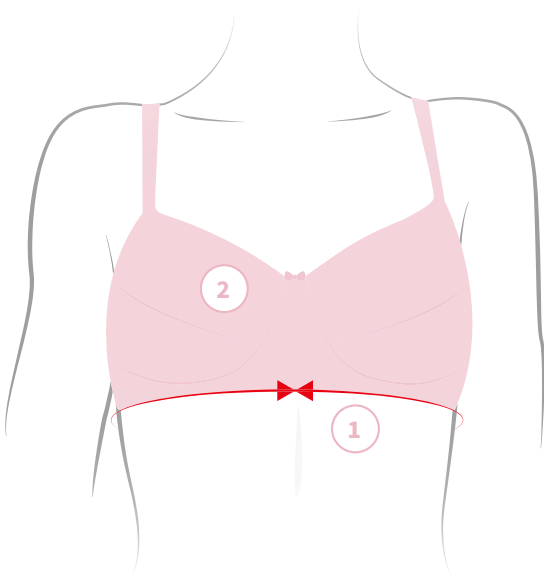

The following pages outline all the necessary steps that will enable you to provide optimal care for your patients.

Finding the perfect bra

Get the perfect fit in 3 easy steps. Here's how to determine the right bra size for your patient

1. Underbust measurement: measure the circumference (e.g. 86 cm) around the underbust band while the patient is still wearing her bra.
2. Half overbust measurement Measure from the middle of the chest (sternum) over the fullest part of the remaining or non-operated breast to the centre of the spine. Multiply this measurement by 2 to determine the cup size, e.g. 51 x 2 = 102.
3. Find out the bra size required using the sizing chart.

These instructions are intended as guidelines only. You may need to choose a slightly different size for the perfect fit.

Alternative sizes

Example: an alternative size for a 75 B would be a 70 C or an 80 A. When trying a bra on, close the bra using the middle hooks.

SIZE YOU TRIED	Your cup fits perfectly but the band is tight	Your cup fits perfectly but the band is loose
	Solution: Go up a band size down a cup size	Solution: Go down a band size and up a cup size

LYMPH CARE PORFOLIO OVERVIEW

Lymph Care Concept 96

 CuraLymph Comfort 97

 CuraLymph Compression 100

 CuraLymph Swimwear 103

Sizing chart 104

Index 127

WHERE THE FLOW BEGINS

LYMPH CARE CONCEPT

The amoena Lymph care concept is ideal for patients after breast cancer therapy with mild lymphatic disease in the thoracic and/or chest area. The CuraLymph Comfort Products are designed to prevent blocking of lymphatic drainage, which can be caused by pressure peaks or constrictions. Together with the Adapt Air or our lightweight breast forms, these products are suitable for patients with mild lymphoedema.

Movement for wellbeing

After breast cancer therapy, especially if edematization occurs due to radiotherapy or lymph node removal, it is crucial to keep on moving. The right amount of exercise is essential – not too little and not too much. Exercise not only stimulates the circulation but also promotes lymphatic drainage.

Products with a light shaping effect and padded, wide straps are ideal for activities.

CuraLymph Comfort and swimwear

The products that are part of the **CuraLymph line** (comfort, lingerie, and swimwear) are designed in such a way that they do not hinder lymphatic drainage due to pressure points or constrictions. The models are ideal for patients with mild oedematisation.

CuraLymph Compression

The models of the **CuraLymph Compression line** complement the product portfolio and comply with patient care guidelines. Medical compression supports the lymphatic drainage by increasing the interstitial pressure. This is ideal for oedematisation of the thoracic wall and/or chest. In combination with movement of the thoracic region, external pressure has a positive effect on the reduction of protein-rich lymph, as this pressure activates the lymphangiomotor system.¹

FEATURES

- Wide shoulder straps for a high level of comfort and relief of shoulders, avoids cutting into the skin and does not impede lymphatic drainage.
- Higher cut sides and back for more support and therefore a higher level of comfort
- Integrated pockets to hold breast forms and shapers in place, concealing unevenness

IMPORTANT TO KNOW!

SensElast® – technology is an innovative 3D technology that joins materials together without seams. A wide range of effects can be achieved, from seamless finishes to textured surfaces.

CURALYMPH COMPRESSION

Compression therapy in lymphoedema care

Our CuraLymph Compression products complement our existing portfolio to provide optimal patient care. Medical compression supports lymphatic drainage by increasing interstitial pressure. This is ideal where lymphoedema has developed in the thoracic wall and/or chest. External pressure, in combination with movement of the thoracic area, has a positive effect on reducing the protein-rich lymph, as this pressure activates the lymphatic system.

Compression therapy is usually a long-term treatment and requires appropriate products, which are used by the patient if there is a medical indication, as advised by their medical team.

Lymph Flow Long
Front Fastening Soft Bra

FEATURES

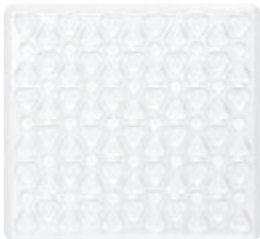

- Wide, adjustable straps for a high level of comfort and support
- Medically effective pressure (medical compression class 1)
- High coverage
- Textured material on skin provides a light massaging effect and microcirculation

Product name Price category	Sizes Item No. Colour	Features Material
<p>LYMPH FLOW LONG Soft Bra With Front Closure advanced</p> 	<p>S, M, L, XL, 2XL</p> <p>○ 44813 white ● 44815 black</p>	<ul style="list-style-type: none"> • Medically effective pressure (medical compression class 1) • High level of comfort for women with mild lymphoedema • Light massage effect and microcirculation • Ideal for physical activities and during the night • Flat seams prevent cutting into the skin, lymphatic drainage is being supported <p>89 % Polyamide 11 % Elastane</p>
<p>LYMPH FLOW Front Fastening Soft Bra premium</p> 	<p>S, M, L, XL, 2XL, 3XL</p> <p>○ 44814 white ● 44816 black</p>	<ul style="list-style-type: none"> • Medically effective pressure (medical compression class 1) • Innovative bonding technology • Flat seams prevent cutting into the skin, lymphatic drainage is being supported • Innovative SensElast® – technology on the side panels: Maintain a light massage effect in combination with movement and microcirculation • High padded back closure: Good coverage, thus increased comfort <p>50 % Polyamide 38 % Silicone 11 % Elastane 1 % Polypropylen</p>

EXPERT TIP:

Lymph Flow SB FC is ideal for breast oedema, or if increased compression is required. Through daily wear and washing, the material adapts to the body.

Lymph Flow Long SB FC has high-functioning concealment, which is most suitable for oedema on the thoracic wall and/or dorsal, proximal or axillary emphasized oedema.

Product name Price category	Sizes Item No. Colour	Features Material
<p>LYMPH FLOW Pressure Pad basic</p> 	<p>020: 10 x 11 cm (packaging unit: 2 units) incl. Soft Cleanser (30ml) and Soft Brush</p> <p>021: 15.5 x 21 cm (packaging unit: 1 unit)</p> <p style="text-align: center;">New Size!</p> <p style="text-align: center;">● ●</p> <p style="text-align: center;">020 021 clear clear (large)</p>	<ul style="list-style-type: none"> • Rectangular silicone pad (100% medical silicone, biocompatibility tested according to ISO 10993), ideal as an insert in the garment to increase pressure directly and support oedema therapy with specifically localised oedema support • A textured surface provides a light massage effect and supports the loosening of fibrotic tissue, as well as a light scar massage • Washable and reusable; easy to clean for daily use • Can be adjusted to the individual size of the patient <p>90% Polydimethylsiloxane, 10% TPU</p>

CURALYMPH SWIMWEAR

Overview

Product name Price category	Sizes Item No. Colour	Features Material Shaping Level
<p>LAGOS Tankini premium</p> 	<p>38–56 B, C, D, E</p>  <p>71787 black/white</p>	<ul style="list-style-type: none"> • Tight fit and use of shaping material provides a slight shaping effect and is ideal for large sizes • High neckline hides scarring • High back neckline at the back and wide straps for additional comfort and to relieve the shoulders, to avoid cutting in and therefore not to hinder the lymphatic flow • Ideal for larger sizes  <p>68 % Polyamide 32 % Elastane</p>
<p>LAGOS Swim Bermuda premium</p> 	<p>38–56</p>  <p>71667 black</p>	<ul style="list-style-type: none"> • Classic black can be worn with many other tops in the collection • Use of shaping material provides a slight shaping effect and is ideal for large sizes • Bermuda length for maximum coverage • Seamless finish at the leg hem to avoid cutting in and therefore does not lymphatic drainage  <p>68 % Polyamide 32 % Elastane</p>

Product colours may vary slightly from those shown in the photos.

EXPERT TIP:

Exercise is very important to help prevent and/or relieve lymphoedema. Swimming is particularly helpful – the pressure of the water and the movement stimulate lymphatic drainage.
